

### Western Sahara - S0 Martti Laine OH2BH and Risto

OH3UU will operate from Western Sahara May 11-17, with an emphasis on CW. Watch 1821, 3501, 7001, 14020, 21020, and 28020 kHz on CW and 1831, 3791, 7091, 14145, 21195, and 28495 kHz on SSB. Callsign and QSL route will be announced later. They'll help Western Sahara apply for its own ITU call block, and assist S01A with his station.

**Ocean Island - T33** The T33JS/RA operation was postponed due to difficulties getting equipment to Tarawa, and then with the boat to Ocean. Start date was pushed back to May 10, with operation for two weeks or "until the food runs out." See T30RA entries in Bandpass for propagation ideas and favorite frequencies of Bob KN6J, who will be helping Jim Smith VK9NS. QSL T33JS to VK9NS, and T33RA to KN6J.

Edited by Chod Harris VP2ML

America's Premier Weekly Amateur Radio Publication

**Sable Island - CY0** Wayne VE1CBK operates from this Canadian island May 9-12, after 2300Z daily. SSB only, operating split on 10-20 meters. WARC bands, too. He likes the 14250 and 14226 kHz nets. QSL home call.

**Marion Island - ZS8** Peter ZS8MI has made more than 1500 SSB QSOs, but no CW QSOs. He'll be more active, now that the supply ship has left. In addition to those entries in Bandpass, try 14122 kHz at 0700Z, 14256 kHz at 1400Z, and 28517 kHz at 1600Z. Peter monitors 50.100 MHz. QSL home call.

**Chad - TT** Jacky F2CW says that F3CW will be active as TT8CW for the next couple of months, starting May 16, on CW only. QSL to F2CW.

**St. Peter and St. Paul Rocks - PY0S** The ZY0SW/S/Y operation is also delayed, and now starts around May 13, for one week. See Issue 475.

### Shortly Noted

- JG1RVN will be on as KC6TY from the Western Carolines May 23-26, on 10-20 meter RTTY. QSL home call.
- Paul I1RBJ says he's active from Monaco 3A for a day each week. Contact him for skeds. He plans RTTY and WARC band activity soon.
- Tom NV4H and Jan N4TBJ will be /VP9 from Bermuda June 2-10, 20-6 meters, SSB and CW, especially on 28325 kHz. QSL home calls.
- Jim W6YA has been very active as S79YA. In addition to the Bandpass entries, he suggests West Coast DXers watch 40-meter CW 13-1400Z Mon.-Wed. QSL home call.
- Roel Bouwman 5H3RB leaves Tanzania in July after making more than 30,000 QSOs. He moves to Lima, Peru in September. QSL Roel via NM2R.
- At Dayton, Don Search W3AZD said that the 5R8VT documentation has been sent to ARRL Hq. by Vince Thompson. The May 5th W1AW DX bulletin says that 5R8VT QSLs are now acceptable for DXCC credit.
- PA0GAM/ST2 now has a QSL manager: PA0GIN. He has the 1987-1989 logs, so you can get that long-lost QSL!
- The French DX Foundation meets on 28470 Khz after 0900Z. Their address Box 88, F-35170 Bruz, France.
- Australian novices are often found in the 21125-150 kHz range around 0600Z.
- LU1ZA is on the South Orkneys, not South Shetlands. HL5BDS is on the South Shetlands.
- Regulars (callsign, frequency or band, UTC): 3B8CF 14033 0300Z; 9J2KF 14012 2200Z; KN0E/KH3 20M CW 05-07Z and 14-1500Z; SU1EE 14029 0130-0330Z; TA2BK 14022 2200Z; UI8AA 14002 0230Z; VK0MP (Antarctica) 14005 1400Z; VU2TTC long path 14005 1200Z; YN/SM0OIG 20M CW 0100Z; Z21FN long path 14012 1300Z; ZL7TZ 14014 0900Z; 7X2DS 14195 0200Z; 8R1AH 14185 0345Z; VR6KY 14250 0100Z; 4S7EA 21008 2345Z; CE0FFD 28015 2230Z; and 3DA0BK 28515 13-1700Z.
- SSB net check-ins: 40M 6W7OG; 20M JX1UG XX9KA FO5LZ FT4ZE 3C1MB EP2HZ; 15M TZ6MG S79MST 4S7NMR. (A list of some DX nets is available from The DX Bulletin for an SASE.)
- Islands On The Air: ED2ISA from San Anton Is. May 12-14; TV6GLE from Glenan Island (EU-94) June 8-13 (3710, 7090, 14130, 21210, 28410 kHz on SSB, 10 kHz up on CW. QSL F6IPG or FD1OGG); GB4SRS from Steephholm Island (EU-05) May 27-29; JI6KVR Danjo Island (AS-56) May 26-28; UA1POL/1 is on Vaigach (EU-86) until July; WA4DAN from Cedar Key (NA-76) May 20-21 (14260, 21260, and 28560 kHz); IM0/IS0YUJ from Isola Rossa July 7-9 (EU-41?) (QSL IS0YUJ or via bureau); DK9FE/SV9 from Crete (EU-15) May 21-June 9, (14015, 21025, and 28015 kHz and the IOTA net on 14260 kHz); and EJ0A from Aran Island (EU-06) June 2-6, QSL W2ORA or EI8EM. [The latest IOTA list, including the new IOTA entities in the Caribbean, is available from The DX Bulletin for \$4, postpaid.]
- RTTY stations: HH2BZ 14075 ARQ 0200Z; 5N0ALE 14093 2100Z; SU1EE 21095 1630Z; KG6XO 14082 FEC 0300Z; YI1BGD 14084 0400Z; CE0ZII 14090 0615Z; 9L1SL 21090 0930Z; 9M6HF 21088 1500Z; ZS3B 21092 0845Z.

## Propagation

### Propagation Watch

The geomagnetic field increased in activity at the end of April and beginning of May, degrading the polar path, and reducing signal strengths on the long path. Solar flux continues to hover in the 180-200 range, raising questions as to the future of Sunspot Cycle 22. Optimists look for a dramatic increase in flux over the next six months, in sharp contrast to the recent stagnant level of flux.

The short term propagation forecast is for very good conditions, based on solar activity during the last solar revolution 27½ days previous. The prolonged stretch of low geomagnetic activity that produced the good DX in mid-April may be duplicated in May. If so, make the most of the good openings; they may be the last such until Fall, as the maximum useable frequency (MUF) will drop with the approach of summer. Also, geomagnetic activity is expected to pick up again later in May, again based on 27½-day recurrence.

When the K index is 3 or below, look for excellent long-path openings on 30, 20, and 18 meters to the south at local dawn, and for a hour or so after dawn. The higher bands should be good on the north-south paths most of the day, with some worldwide openings on 15 meters. In the early evening, try the short path on either side of the North Pole, for Russians and deep Asians, on 20 and 15 meters. When the geomagnetic field cooperates, 20 meters will remain open much of the night, to some part of the world.

DXing on the lower bands will be increasingly frustrating, as seasonal noise, increased absorption, and the possibility of an active geomagnetic field makes signal-to-noise ratios extremely low.

At this stage in the sunspot cycle, band conditions can change rapidly. Check WWV at 18 minutes after the hour for the up-to-the-minute news, especially the K index.

## Dayton DX Forum

DX Advisory Committee (DXAC) Chairman Rick Roderick K5UR led the DX Forum at the Dayton Hamvention. The main topic of discussion was the change in DXCC Country Criteria Rule 2(a), concerning islands offshore of island nations. Rick pointed out that the old Rule 2 was ambiguous, discriminated against island nations, and had been inconsistently applied. The new rule was written to be more precise, and to allow a consistent interpretation of future New Country applications. Rick said the DXAC anticipated handling more New Country applications, based on the new Rule 2. This turned out to be the case, as there are presently six New Country applications presently on file with the DXAC, five of them based on the new Rule 2(a). Rick briefly discussed the applications:

1) Frederick Reef lies about 240 miles off of Queensland, Australia, in the Coral Sea. The 'parent country' of Australia is clearly an island, and a DXCC country by reason of government. However, the Swain Reef lies about midway between Frederick and the VK mainland, and may disqualify Frederick.

2) Marquesas Islands lie a minimum of 288 miles from the 'parent country' of French Polynesia. However, the question here is whether French Polynesia is a country 'by reason of government.' Rick explained that French Polynesia does not belong to the UN, nor the ITU, does not use an ITU-assigned callsign block, and doesn't enter into its own diplomatic relations, nor maintain its own standing army. It does issue its own currency and postage stamps.

3) The Austral Island application is identical to that of the Marquesas, as the Austral islands lie a minimum of 324 miles from the 'parent country,' and more than 500 miles from the Marquesas. If the Marquesas is added to the DXCC list, Austral with follow immediately.

4) Conway Reef has a leg up on the other applications for separate DXCC status, as the successful Rotuma application established that 'parent country' Fiji is a DXCC country by reason of government. Since Conway lies 281 miles from the nearest point of Fiji, and 658 miles from Rotuma, the application of separate country status is very likely to be approved.

5) Ocean Island (or Banaba Island) lies more than 250 miles west of Western Kiribati, and more than 1000 miles from Central Kiribati. Two potential problems with the separate country application for Ocean Island concern whether Western Kiribati is the 'parent country' of the Kiribati [which a little research with clearly establish -ed ex-T32AW], and whether Rule 2(b) will have to be invoked, meaning that Ocean Island must be more than 500 miles from the Central Kiribati, which it is.

6) One additional new DXCC country application has been received from Paul Bavassano I1RBJ, for the Basilica del Santo, a Vatican enclave in northern Italy. That application is presently on hold, pending additional information from I1RBJ, including details of the relationship between the Basilica and the Vatican, and good maps of the area. DXAC vote will probably be delayed until Fall.

Finally Rick said that the possible literal interpretation of DXCC Country Criteria Point 3 (separation by foreign land) which might qualify certain islands in the Great Lakes and the West Coast will not be honored. The DXAC may modify that rule to ensure a reasonable interpretation.

# B . A . N . D . P . A . S . S

Key to Bandpass: Callsign, frequency, UTC, day of the month, state. \* = long path. P = packet.

All "portable" calls listed with country of operation first, regardless of format used on the air.
